REFRACTORY MONOBLOCK FLOOR
The Pavesi RPM 140x160 features the world's only refractory commercial brick oven floor in one solid block.

TRADITION & TECHNOLOGY
The Pavesi RPM 140x160 is designed to preserve traditional Italian hearth oven dynamics with maximum consistency for high output.

VERSATILE & RELIABLE
The Pavesi RPM 140x160 design exceeds at holding a wide variety of temperatures to achieve almost any pizza size and style.

Approved by the Association of Neapolitan Pizzaiuoli of America

VERSATILE & RELIABLE
The Pavesi RPM 140x160 design exceeds at holding a wide variety of temperatures to achieve almost any pizza size and style.

 FEATURES
The Pavesi RPM 140x160 is a hand-built Italian hearth-style brick oven designed and manufactured in Modena, Italy. The solid, single piece refractory floor diameter is a 55" x 63" oval block, with a front-facing stone arch opening which allows access to the hearth at 23" wide by 11" tall. The internal refractory dome and single piece floor are sealed with a refractory cement and over-insulated with high-quality asbestos-free ceramic blankets to ensure maximum heat retention. The oven structure is formed by a wrapped steel sheet painted “Rosso Corso” red, and sits on top of four circular dark grey steel legs. The oven is supplied with a single-flame powered gas burner for use as a primary oven heat source. The self-modulating gas burner monitors the oven floor temperature to adjust the BTU input for maximum efficiency and steady performance. Custom facade options can be found online at www.forzaforni.com.

REVISED SPRING 2018. As products continue to improve, spec sheets may change without notice. Please call Forza Forni for the latest specification sheet and for further details.

MADE IN ITALY

DOC#: RPM140X160-0518
**DETAILED SPECS**

**WEIGHT:**
3,130 LB

We make every effort to provide accurate information regarding manufacturer's reported dimension information. Please note that due to the artisan nature of the manufacturing process, from time to time, product sizing and ship weight may vary slightly.

**CLEARANCES**

Minimum clearance of the oven (built-in or standalone) to combustible materials are as follows:

- **Top:** 14” (356 mm)
- **Back & Sides:** 1” (25 mm)

Non-combustible flooring must extend out at least 36” (914 mm) from oven opening and at least 30” (762 mm) to each side of the opening.

Do not fill required air space with insulation or other materials.

**VENTILATION REQUIREMENTS**

Direct connection as a natural draft, grease-rated chimney system per NFPA 96 and UL 2162 is recommended. If the duct run exceeds 20 feet or incorporates a 90° elbow, a UL 705 & UL 762 listed rooftop exhaust fan shall be installed to ensure adequate pressure within the duct. A Listed Type 1 exhaust hood, or one constructed in accordance with all relevant local and national codes (NFPA 96), may also be installed above the oven in instances where a natural/power draft chimney system is otherwise impossible. See “Ventilation Document – Pavesi” for details.

- Operational airflow: 150-200 CFM
- Static Pressure at Flue Collar: 0.05 in H₂O

**ELECTRICAL REQUIREMENTS**

- 120 VAC, 1.2 A, 60 Hz
- Plug connection is a NEMA 5-15P Plug.

**WARRANTY INFORMATION**

10 year limited warranty on internal refractory parts. 1 year limited warranty on electrical, gas and other components. See warranty document for details.
